

## UGCX MANUAL PART 3

# ADDING YOUR CUSTOM GRAPHIC/ LOGO TO A VEHICLE

# OVERVIEW

By default, the vehicles in UGCX bear the UGCX logo.

Below is an example of the Comet with the UGCX Logo on the hood.

However, you can change the logos on the vehicles to match your needs. You may want to use an airline logo, or a VA logo, or any logo you desired. It's up to you!

# HOW TO ADD YOUR OWN LOGO

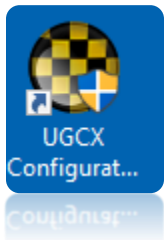

**STEP 1** – Create your custom graphic.

Graphic requirements:

- **JPG format**
- **256 by 128 pixels** (exactly!)

**STEP 2** – Open the **UGCX Configuration Manager** and select the **LOGO MANAGER**.

The UGCX Config Manager can be opened via the UGCX desktop icon:

Or via **ULTIMATE GROUND CREW X** folder in the Windows Start menu.

Config Manager V1.0

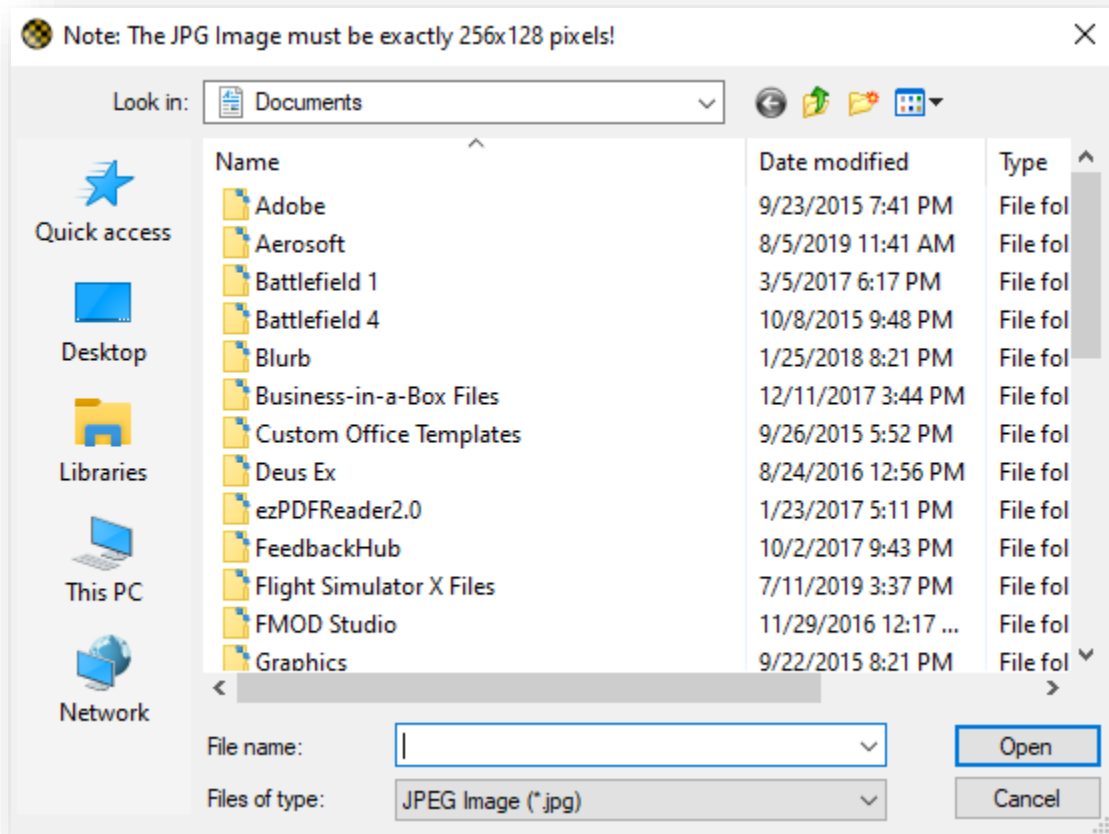

**STEP 3** – Select the vehicle class to which you want to add your logo.

[Tugs](#)

[Follow Me Truck](#)

**STEP 4** – Browse to and select your custom graphic.

Assuming the size and file type is correct, your logo will be updated, and it will be visible on your Tug or Follow Me Car!

Your custom logo will now appear on your selected vehicle class!
